

# AVIATION BAY IDs

## CASE STUDY

Design & development of a built for purpose bay identification to easily retro-fit existing

### **Brief:**

Approach from airport electricians, who were continually having to service & repair airside bay markers, due to a poorly supplied product done 2 years earlier.

Prepare a highly specified pre-assembled product that can be easily & quickly installed to retro-fit & replace failing bay markers.

### **Works:**

- Document & supply install instructions for electricians.
- Supply highly bespoke acrylic & LED illuminated signage ID's, factoring site conditions.

### **Outcome:**

Hassle free & smooth transition of airside works ensuring minimal operational disruptions in a timely manner.
